

Product datasheet

Specification description Mozawall®

Pet-G wall panels, full color digitally printed. The wall panels of 454 x 454 mm (390 grams per panel) are each preformed with a pattern of 576 mosaic stones. The mosaic is grouted after installation, such as traditional tiling and glass mosaic.

Product description

Mozawall® is an affordable alternative to Italian glass mosaic. Mozawall® is delivered in Pet-G plastic wall panels, each of which is inlaid with a mosaic tile pattern.

Every photo, image, graphic pattern or logo can be processed into a pixelated pattern.

The creative possibilities from **Mozawall**® are unlimited.

The patented system is simple and fast to install, in contrast to traditional glass mosaic. The **Mozawall**® wall panels are delivered ready-made. They are easy to glue on a leveled wall, after which they immediately can be grouted.

The mosaic panels are easy to cut to size so that difficult sawing and dusty cutting is unnecessary.

Unlike glass mosaic, **Mozawall**® is not vulnerable. There are no mosaic tiles breaking out and the system is watertight. Ideal for wet areas such as bathrooms, spas, saunas and swimming pools.

The result is astonishing: **Mozawall**® offers a luxurious and exclusive look against one significantly lower investment compared to traditional glass mosaic.

Technical data

WALL PANEL

material	massive copolyester
weight	13
size	454 x 454 mm
thickness	3,5 mm

MOZAÏEK TEGELTJES (PIXELS)

size (wxh)	17x17 mm
number on 1 panel	576
grout	2 mm
print	full color CMYK on the backside

STANDARD

fire qualification sheet material	B-s1, d0	EN13501-1
impact resistance	sharp serrated, ca 7 Kj/m ²	ISO 179/1eA
tensile strength	>45 MPa	ISO 527-2/1B/50
moisture absorption	after storage in water 23 C 0,6%	ISO 62-1
